Subject Index to Volume 28

Algorithmic equivalence, 275
Algorithms, 275
Analytic complexity, 375
Augmented Lagrangians, 135

Biconjugate directions, 259
Bicriterion mathematical programming, 253
Boundary-value problems, 233, 411
Bounded sequences, 353
Brower's fixed-point theorem, 49

Cantor's intersection theorem, 429
Chance-constrained programming, 89
Cluster points, 353
Competing populations, 585
Compromise solutions, 29
Computer-aided design, 331
Computing methods, 1, 185
Conjugate directions, 259, 263
Conjugate-gradient methods, 1, 259
Constrained optimization, 135, 549
Convergence proofs, 429
Convergence rate, 303
Coupled Riccati equations, 49

Decision problems with multi-objectives, 501
Decomposition and coordination methods, 549
Design problems, 331
Determinantal equations, 157
Differential equations, 233, 411
Differential games, 213, 233
Discretization, 483
Distributed-control problems, 109
Domination cones, 501
Dynamic programming, 163

Edge vectors, 501
Efficient points, 29, 253
Eigenvalues of matrices, 157
Eigenvectors of matrices, 157

Fundamental matrix, 77

Geometric programming, 11
Gradient-projection method, 483

Hilbert spaces, 233, 411
Homing problem, 213

Imbedding systems, 103
Implementable algorithms, 483
Incomplete information, 213
Initial-value methods, 157
Integral equations, 103
Interval arithmetic, 11
Invariant imbedding, 77, 525
Iterative processes, 353

Lagrange generalized gradients, 549
Lagrange multipliers, 135
Least-distance problems, 275
Linear state inequality constraints, 185

Mathematical programming, 1, 331, 483
Maximum principle, 391
Method of adjoints, 77
Method of complementary functions, 77
Method of particular solutions, 77
Minimax principle, 391
Minimax problems, 363, 375, 391
Minimum problems, 109
Multicriteria optimization, 29
Multilevel control structures, 549
Multiobjective optimization, 253
Multiple criteria optimization, 435
Multiplier methods, 303

Nash strategies, 49
Necessary conditions, 391
Newton's method, 11
Nondifferential constraints, 185
Nondominated solutions, 501
Noninferior points, 29
Nonlinear constraints, 483
Nonlinear equations, 11
Nonlinear optimization, 1
Nonlinear programming, 1, 135, 331
Nonseparable performance index, 549
Nonzero sum linear–quadratic games, 49
Numerical integration, 363, 375
Numerical methods, 1, 185

Optimal algorithms, 375
Optimal conditioning, 453
Optimal control, 185, 303, 391, 435
Optimal search techniques, 429
Ordered criteria, 435
Ornstein–Uhlenbeck process, 89
Outer approximation algorithm, 331

Parallel processing, 163
Pareto-optimal points, 29
Partially linear state inequality constraints, 185
Payoff relationships, 233, 411
Penalty functions, 135, 303
Polar cones, 501
Population harvesting, 585
Properly noninferior points, 29
Pursuit–evasion games, 233, 411

Quadratic optimization, 259, 263
Quadratic programming, 275
Quadrature formulas, 363, 375
Quasi-Newton methods, 135, 453

Rate of convergence, 135
Renewable resource management, 585
Resource management, 585
Riccati equation, 303, 525

Secure strategies, 233, 411
Sequential gradient-restoration algorithm, 185
Sequentially compact spaces, 353
Signomial programming, 11
Singular control, 585
State inequality constraints, 185
Stochastic control theory, 89
Stochastic differential games, 233, 411
Sufficient conditions, 429

Time-lag systems, 103
Transformation techniques, 185
Two-point boundary-value problems, 77, 525

Unconstrained optimization, 263, 453
Uniqueness theorems, 109
Updating schemes, 453

Variable-metric minimization, 163
Vector maximization, 253

Worst-case algorithms, 363, 375
